## THE FIRST COLLECTIVE ACTION SUMMIT FOR FASHION IN PARIS

### SUPPORTING UNITED NATIONS SDGs 2030

PARIS, 04.10.2019, 20:48 Time

**USPA NEWS** - Circular Fashion Summit is the First Collective Action Summit (powered by Lablaco), supporting United Nations SDGs 2030. It has a Clear Aim to tackle Environmental Issues and accelerate Digital Transformation of the Fashion and Textile Industry, by uniting Industry Leaders to share their Knowledge....

Circular Fashion Summit is the First Collective Action Summit (powered by Lablaco), supporting United Nations SDGs 2030. It has a Clear Aim to tackle Environmental Issues and accelerate Digital Transformation of the Fashion and Textile Industry, by uniting Industry Leaders to share their Knowledge. As the First Circular Fashion Social Platform powered by Blockchain, the Mission is to accelerate the Digitalization and eventually Transition towards the Circular Economy of the Fashion Industry. By providing the Open Platform as a Technology Enabler, the aim is to create a 360° Eco-System introducing New Sustainable Business Models and Re-Defining the Relationships between Retailers, Brands, Designers, Influencers, Content Creators and Consumers within a Single Platform. With this Tool, both Businesses and Individuals can easily manage to a New Closed-Loop Consumption System with Impact Measurement.

Quote from Green Strategy, June 2014

"More sustainable fashion can be defined as clothing, shoes and accessories that are manufactured, marketed and used in the most sustainable manner possible, taking into account both environmental and socio-economic aspects. In practice, this implies continuous work to improve all stages of the product's life cycle, from design, raw material production, manufacturing, transport, storage, marketing and final sale, to use, reuse, repair, remake and recycling of the product and its components. From an environmental perspective, the aim should be to minimize any undesirable environmental effect of the product's life cycle by: (a) ensuring efficient and careful use of natural resources (water, energy, land, soil, animals, plants, biodiversity, ecosystems, etc); (b) selecting renewable energy sources (wind, solar, etc) at every stage, and (c) maximizing repair, remake, reuse, and recycling of the product and its components. From a socio-economic perspective, all stakeholders should work to improve present working conditions for workers on the field, in the factories, transportation chain, and stores, by aligning with good ethics, best practice and international codes of conduct."
